

Using Club Toaster

As you can see from the contents of your package, you still have one more shipment to receive from us. When the CD's arrived December 24th we were disappointed to discover that our supplier had not sent Issues 18, 21, or 23. Rather than waiting any longer, we decided to ship you what we had and send the rest as soon as they came. You can expect the final shipment in the next few weeks. There should **NOT** be a long delay. Although we've been unable to contact our supplier due to the holidays, we are under the impression that the CD's are already pressed and on their way to us.

The other CD's have the remaining backdrops, wipes, and the rest of the content. As a special thanks to all your patience we did the clubs a little differently this time. Wherever we could we put the content together. This means the textures are all on one CD, as are the wipes, backdrops, color fonts, etc. This will make it much easier for you to find what you are looking for rather than flipping through all 24 CD's.

In addition, we were able to squeeze almost ALL the content from Issues 1-24 on the remaining CD's. For instance on Issue 19, you will find every texture, color font, and brush that was ever included on Club Toaster. For those of you who never received year one of Club Toaster this is a real bonus. To those of you who have year one this makes finding what you want much easier.

What's Next for Club Toaster?

When you receive your last issues, it will mark the end of Club Toaster in it's current form. We are retooling it so that we can better serve you and your changing production needs. When it returns in its new form it will be better than ever. **But, our first order of business is to figure out how we can assure you that you will never get a CD that is late again.** We are not leaving the Toaster/Flyer market, this is our home and we will continue to develop products for this great system. Stay tuned because we have some big things planned for 1998. You'll hear from us again in March and I don't think you'll be disappointed.
